

Rubber Flooring – ComforTech & Optix

RUBBER FLOORING

New From Johnsonite

A Longer Wearing – Safer Walking Rubber Flooring

A revolutionary new concept - a **cushioned** rubber flooring system that delivers comfort, safety, style and long wear. ComforTech is so good, it comes with a full **10 year warranty!**

Now — in two surface patterns:

- **Checker** – unique raised pattern in all 24 ColorMatch colors.
- **Optix** – textured surface with colorful accent chips, in 8 color combinations.

Here is a “new generation” in rubber flooring - a 3 layer construction consisting of a slip resistant, abrasion resistant, tough wear layer; a cushion core; and a non-woven polyester backing. Comfortech is vulcanized so the layers will not delaminate. Truly a high performance, low maintenance flooring! The 3 layers are:

- (1) **WEAR LAYER:** The wear layer is a durable, exceptionally tough rubber surface that resists abrasion, staining and impact. Both patterns meet ADA requirements for slip resistance. Comfortech is not damaged by normal high-heel traffic.
- (2) **CUSHION CORE:** The unique cushioned core creates a softer, more comfortable walking surface that cushions the step; diminishes fatigue; acts as a thermal insulator and a sound insulator; reduces heat loss, resulting in lower heating and cooling bills; absorbs sound better than almost any other rubber flooring.
- (3) **POLYESTER BACKING:** Non-woven polyester backing reinforces and strengthens the flooring system and helps to hide minor subfloor imperfections. The backing allows the use of regular environmentally safer one part adhesives.

	Thickness	Width	Roll Length	Roll Weight
Checker	0.120"	54"	32.8 lin ft	130 lbs
Optix	0.100"	55"	32.8 lin ft	107 lbs

To order ComforTech, to see a full color palette of available colors or for more detailed information, see pages 11 – 12 of the full Johnsonite catalogue insert after page 8.

Rubber Flooring – Prima™ Marbelized

New From Johnsonite

Now designers can create their own customized colors in rubber tile to achieve a custom elegant look.

Prima combines a background color with up to 3 colors in a marbelized pattern. While there are 8 standard color combinations, custom colorations can be easily created from any of the 29 Prima colors. Tiles are 1/8" thick and are available in either 12"x12" or 24"x24" sizes.

Rubber treads, stringers and risers can be produced in the same colorations as the tile for a total matching look. The ColorMatch® system guarantees perfect coordination of Prima tile with base, trims and all other Johnsonite products.

See pages 14-15 of the full color Johnsonite catalogue insert after page 8 for full details and color choices.

Roundel Rubber Tile

Johnsonite's Roundel Rubber Tile is made in 2 patterns, in two thicknesses and in 33 designer colors. Choose any of the 24 *ColorMatch*® colors and you can finish the job with matching base, treads, risers, stringers, corner bumper guards and trims in rubber or vinyl. Smooth surface tile can be used for borders, feature strips, theme tiles, etc.

The square and round raised disk tiles feature a low profile height (.025") and tapered design to facilitate cleaning and to prevent dirt from collecting, and to reduce vibration and noise from wheeled traffic. The built in self-releasing wax makes maintenance a snap ... the tile will "self heal" and most scratches and abrasions will disappear when the tile is washed and buffed.

Use .155" thick tile for high traffic areas, .125" height for moderate traffic. Roundel is flexible and easy to handle, and it will not shrink, crack or separate. Use on, above or below grade if there is no moisture or hydrostatic pressure in the subfloor. Tiles are a full 24" x 24" for easy installation and fewer seams.

The .155" tile carries a **full ten year limited warranty**.

Roundel Rubber Tile Specifications			
PATTERN	Thickness (inches)		Style No.
	Disc Height	Overall	
Round	.025	.155	RT- xx -155R
	.025	.125	RT- xx -125R
Square	.025	.155	RT- xx -155S
	.025	.125	RT- xx -125S
Smooth	-	.130	RET - xx - 130
	-	.100	RET - xx - 100

To order: choose a style number from the table and replace the "xx" with a two digit color number from the color chart at the right.

Roundel Stair Treads

Roundel Rubber Stair Treads match Roundel Tile with both round and square raised disk patterns and the same 33 colors; the raised discs on the treads are thicker (.040") for longer wear. Treads are made in square nose only; the 2" nose is hinged to conform to stair nose configurations.

NEW !! The new one-piece Roundel tread and riser is designed for quicker installation and easier maintenance.

All Roundel Treads can be ordered in a Visually Impaired design with a 2" wide contrasting color abrasive or rubber strip at the nose. The 2" strip does not cut through any of the disks. See page 17 of the full color Johnsonite catalogue after page F-8 for more details, and for color samples.

Installation Tip

Instead of using epoxy for installing rubber tile and stair treads use the new generation one-part adhesives such as the Johnsonite 965 Flooring and tread adhesive. This product is solv-free and virtually odorless too!
